13 Description of Equipment or Protective System:

The T595XP is an electro-mechanical current to pressure converter. The unit operates on a 4 to 20 mA current loop. The ambient operating temperature range of the T595XP is dependent on the Energy Limitation Parameters as specified below.

The housing is constructed of epoxy-painted A380/A383 Aluminium Alloy. The housing is available with a threaded blank cover. The enclosure contains one M20 x 1.5 wiring entry. The housing is provided with internal grounding connection. An o-ring is provided between the cover and base for environmental protection. Two sintered flames arrestors are pres-fit into the base of the housing.
